Recommendation B. 3.

1. We do not concur in this recommendation.

25X1A6a 2. The newspaper clipping services under discussion are currently utilized by only three field offices: [redacted] at a total cost for FY 1956 of approximately \$500.00. All three of these offices have high production records. In the opinion of the chiefs of these offices, the clipping services in their outlying areas have (a) produced valuable sources and reports which would not have been located otherwise, and (b) resulted in a substantial net saving in time and travel. It is our opinion that offices which have responsibility for areas of a type which make these services profitable should be permitted to continue to utilize the services.
